

# TRU-JAMB

**Healesville  
Timber & Hardware**

Supplier of TRU-JAMB Systems

Phone: 03 5962 4600

## **READY TO USE DOOR JAMB** *The newest innovation to new homes and renovations*

**Tru-Jamb System** is a pre-fabricated door jamb with both sides of the architrave supplied, one side already fitted. The TRU-JAMB is fitted straight into the frame opening and nailed in.

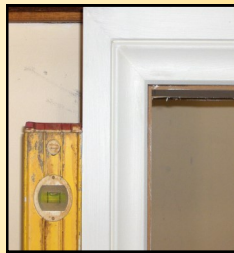

The conventional method of installing door jambs and subsequent architraves is prone to not having perfect joints requiring additional time for sanding and puttying.

By having the door jamb “tru” and square, the architraves will have perfect joints every time, producing quality workmanship.

### **INSTALLATION : 3-easy steps**

- 1- Put TRU-JAMB in the frame opening
- 2- Use level to plum TRU-JAMB in the frame opening “hinged side first”
- 3- Nail the TRU-JAMB in

*It's that simple!*

We provide a complete service. Not only do we supply perfect mitres to the **Tru-Jamb System** but also offer a service of pre-made door and window architraves. Perfect mitres for the whole job!

**TRU-JAMB**

**Perfect Mitres**

**TRU-JAMB with DOOR**

**Perfect Mitres & Margins**
